## BILL DEFINITIONS

**KWH** - Kilowatt Hour - energy consumed if 1,000 watts (ex. ten 100w bulbs) are used for one hour.

**kWh or Demand** - The highest amount of electricity used in any 1/4 hour during the billing period. 1 kW is equal to 1000 watts.

**Meter Multiplier** - Converts recorded use to total use on meters that are designed to only record partial use.

**Basic Service** - The minimum daily cost for a 24/7 connection to the electric system.

**Delivery Service Adjustment** - Charge or credit applied to balance actual expenses with budgeted expenses. Creates long-term rate stability by accounting for unpredictable costs, including storm response.

**Distributed Energy Resources (DER) Charge** - the cost of customer programs such as energy efficiency and conservation, as well as new technologies and methods for producing and storing energy.

**Revenue-Based PILOTS (Payments in Lieu of Taxes)** - State and local taxes on utility revenues. This does not include property taxes assessed on the electric system, which make up 15% of your bill.

**Revenue Decoupling Adjustment** - Charge or credit applied to balance actual delivery revenue with the approved revenues level.

Encourages energy efficiency by breaking utility dependency on sales revenue.

**NY State Assessment** - Assessment imposed on all utilities and collected on behalf of the State.

**Suffolk Property Tax Adjustment** - The amount collected by PSEGLI from Suffolk County customers representing the overpayment of property taxes to the Shoreham taxing jurisdictions from a court-ordered legal settlement dated January 11, 2000.

**Sales Tax** - State and/or local sales taxes.
